- Ability to plan and deliver software on time
- Attention to abstract and highly readable code to humans
- Strive to make XHTML files that comply with W3C standards
- Appealing and contemporary web design

July 2004 – Present

Employment history

eStore Printing, Minneapolis, MN

Web developer, designer

Architected and developed a turnkey e-commerce software. It's currently installed on more than 30 domains.

This software has a fully functional shopping cart with file upload ability. Customers can use templates to design business cards and other printing products online, and download generated PDF files on the fly. The backend admin site also allows you to manage information like: customer orders, pricing for printing products (which have many options), coupons, customer accounts, profits, search, reports, charts, etc.

Product website: www.estoreprinting.com

These are just a few of the many websites where the software I designed is installed::

www.thecatholicspiritprinting.com • www.print.adleap.com • www.2print.com • www.jjprintservices.com

Assisted in developing other websites, like:

www.agency10.com www.aqua-consulting.com

www.pgiprint.com www.purpleprinting.com*

* This e-commerce website was done for 1,5 million registered members of Red Hat Society. The business is closed at the moment.

2000 – 2004 Immigrated to the United States.

I worked at various businesses that I was assigned to, through temp agencies, such as, Express Personnel Services.

1998 – 2000 **Five Continents Group**, Vilnius, Lithuania

Graphic designer

Concepted and designed ads for magazines, newspapers, newsletters and brochures.

September 2007 **Education**

Brown College

Mendota Heights, MN

Bachelor of Science in Visual Communication (with emphasis in graphic design)

CGPA: 3.95

Freelancing & other fun stuff

Designed and programmed:

www.lrcplus.com

www.smgonline.us

www.poknee.com

www.kedemroses.com

www.healthcarebizsol.com

I teach algebra, geometry, and art classes on a regular basis to a high school homeschooler.

I enjoy chess and look forward to teaching children about this mind challenging game.

References from these and many other clients are available upon request.
